**M**y next-door neighbour has always been a mysterious figure. She began to reveal her secrets on Halloween night...

She destroyed the pumpkins and then she set them on fire to make them sparklers. They wanted to make up with the

brightest pumpkin Halloween party. Wah-hah-hah.

Next, she wanted to make off with our Halloween party, but then she saw a ghost and then she was running on her scooter to discover the haunted house party. Wah-hah-hah.

Next, she discovers the scooter, she shoots it up into the air, and then she breaks it. Wah-hah-hah.

Then she says, "Abbey, help me, help me! Vampire Abbey, help me!" Pumpkin Halloween Frankenstein.

It's a stormy night. She let them all free and she sails the sea. She fires these because she is a witch.

She couldn't get away.

and the pumpkins ran away because there was a witch trying to smash them. Monster high is evil, run away. Then the people

want monsters to turn evil forever. Run away quickly, run away. Now, don't ever come back to the school. Monster high is haunted.

She had weird eyes and sharp teeth, and there was blood on her cheek. Normal people came with her house and she bit them and she was creepy. She must be a vampire because she had a lot of sharp teeth, especially in the front row of her mouth. She only eats blood. She also has sharp nails, and she has red eyes. She ate a flower and fruit. Nothing happened.

The End.
